### Resources To Be Avoided and Mitigation Measures

---

Specify and define mitigation measures that will become a part of the proposed project. Provide a general description of resources which exist within the limits of work or are adjacent to the project that are to be avoided during construction. Note the approximate location of these resources. Attach additional sheets if necessary. The mitigation measures stated in this section should be incorporated into the project's design documents. In order to track and transfer mitigation commitments through the project development process, the Mitigation Memorandum in Appendix D of the CE Handbook must be prepared and submitted to the appropriate channels, including the Contract Management Unit, as the project moves through Final Design and Construction.

Mitigation measures are COMMITMENTS of both the Department and FHWA and are agreed to and approved by the District Executive for Level 1 CEEs and by the Division Administrator of FHWA for Level 2 CEEs.

**PETS 4094: Add questions as follows to record specific mitigation and aid in tracking impacts and associated mitigation. Force the calculation areas to have numeric answers.**
