

CE Expert System

Version 32.0 Release Notes

This version of the CE Expert System was implemented on 14 December 2009.

Clear-Quest #	Description	Area
63	<p>Multiple Design Criteria on “Part A: Engineering Information” documents</p> <p>Users can click the <u>Show Another Design Criteria</u> button up to 4 times, for a total of 5 Design Criteria on a CE package. Verification rules are the same for any additional criteria.</p> <p>Users with existing “Part A:Eng” documents that are still in Preparation status, will have to perform a form-refresh.</p>	Forms
97	<p>Enhancements to the ABP Report</p> <p>District, County, SR and Section values are now pulled from MPMS, regardless of whether or not a matching package is found in CEES. SR and Section are now all of type text for improved sorting in the spreadsheet.</p>	Reports
109	<p>“To-Be-Determined” workflow has been improved for BPA packages</p> <p>Users are now directed to generate the package before making attachments to the Package Document. Previously, users were making attachments first, without generating. This would leave the package as “TBD”, causing confusion in finding the package for later generation.</p>	System

110	Attachment size warning has been added to the Package Document for BPAs Users will now see an orange warning note whenever the system detects an attachment larger than 5MG on a BPA Package Document.	Forms
N/A	Various Enhancements... <ul style="list-style-type: none">• The system-processing box has a new icon, based on Domino 8.5 choices... this icon is smaller and more streamlined for the marquee timer.• Better error handling has been added when the package approval process cannot find the ECMS web service that loads the CE data to the Project Development Checklist.• Spatial problems in the Package Summary report have been addressed.	System / Administration
