

CE Expert System

Version 71.0 Release Notes

This version of the CE Expert System was implemented on 8th June 2021.

Work Item #	Description
WI# 38099	Interface with PennDOT Connects System The CE system functionality that interfaced to the LPN system was replaced to coordinate with the PennDOT Connects system. The fields previously populated with values from the LPN system will use Connects values. All LPN code in the CE has been removed.
WI# 58987	FHWA Fiscal Constraint Memo Update The fiscal constraint memorandum on the package document was updated from the January 28, 2008 "Transportation Planning Requirements and Their Relationship to NEPA Process Completion" to the May 2017 "Memorandum Clarifying Fiscal Constraint." All packages on or after the date of the memo will reflect the change.
WI # 43599	TBD Packages Fix It was possible that when a package was created, the package ID would be "TBD," which created orphan packages that could not be seen by users after they were created.
