

CE Expert System

Version 56.2 Release Notes

This version of the CE Expert System was implemented on 3rd December 2015.

Area	Description	Clear Quest #
Attachments Validations	<p>After the Microsoft security patch update MS15-112 for Internet Explorer published on 11/10/2015, the agent code to validate invalid attachments on server side, is not validating attachments as expected in check-in and verify buttons due to limitations placed on the JavaScript by the security patch.</p> <p>With this release the server side validation of attachment file names is moved to Save button and written in formula language.</p> <p>If a user uploads an attachment that contains an invalid character in the name, error message is displayed when Save button is clicked that states "One or more of the uploaded attachments contains invalid characters (#,'+ % & @?). Please re-upload all attachments after correcting this error."</p> <p style="text-align: center;">Invalid characters are:</p> <ul style="list-style-type: none"> pound sign (#) comma (,) apostrophe (') plus sign (+) percent sign (%) ampersand (&) at-sign (@) question mark (?) <p>The functionality of Check-In and Verify buttons will remain as is.</p>	CEESU00000475
