No significant floodplain encroachment would occur.

If, after consultation with FHWA, it is concluded that there will be significant floodplain encroachment, a floodplain finding is required, and an EIS or EA will need to be prepared because a CEE is not an appropriate level of NEPA documentation. Significant floodplain encroachment is defined in the CE Handbook.

CE Evaluation Part B, Section E Resources To Be Avoided and Mitigation Measures

Specify and define mitigation measures that will become a part of the proposed project. Provide a general description of resources which exist within the limits of work or are adjacent to the project that are to be avoided during construction. Note the approximate location of these resources. Attach additional sheets if necessary. The mitigation measures stated in this section should be incorporated into the project's design documents. In order to track and transfer mitigation commitments through the project development process, Environmental Commitments & Mitigation Tracking System (ECMTS) documentation should be prepared and submitted to the appropriate channels, including the Contract Management Unit, as the project moves through Final design and Construction.

Mitigation measures are COMMITMENTS of both the Department and FHWA and are agreed to and approved by the District Executive for Level 1 CEEs and by the Division Administrator of FHWA for Level 2 CEEs.

Impacts and mitigation commitments are based on Preliminary Design and may change as the project moves through Final Design and Construction. Final design information and final mitigation commitments are included in the ECMTS documentation.
